

this listing of claims wat replace all prior versions, and Estings, of claims in the application:

Listing of Claims:

1. (original) A charger system comprising:

a charger comprising coupling means for coupling to a rachargeable device, wherein the coupling means includes charging means for providing an electrical charge to the rechargeable device; and rechargeable device; and

means for receiving the data from a remote source and selectably transferring the data upon receipt to at least one of the means for transferring and a storage means of the charger.

(original) The charger system of Claim 1, wherein the charging means provides an
electrical charge to the rechargeable device and the means for transferring transfers the data to
the rechargeable device simultaneously.

 (original) The charger system of Claim 1, wherein the means for receiving data receives the data from the remote source via the Internet.

4. (original) The charger system of Claim 1, wherein the rechargeable device is a device

capable of functioning as a remote control device.

. 5. (original) The changer system of Claim 1, whereIn the data includes a list of executable

commands.

6. (original) The charger system of Claim 1, wherein the data includes a schedule for operating an electronic device via the rechargeable devite.

GANZ L

7. (original) A method of providing data to a rechargeable electronic device computating the

steps of:

receiving data from a remote source via a charging device;

selectably storing the received data within the charging device;

coupling the rechargeable electronic device to the charging device;

charging the rechargeable electronic device; and

selectably transferring the stored data and the received data from the charging

device to the rechargeable electronic device.

8. (original) The method of Claim 7, wherein the remote source is a server, and further

including the step of inliating transfer of the data from the server to the charging device by

transmitting a request signal to the server.

9. (original) The method of Claim 7, further including the steps of:

processing the data transferred to the rechargeable electronic device; and

controlling an electronic device via the rechargeable electronic device in

accordance with the processed data.

10. (original) The method of Claim 8, further including the step of programming the charging device via the remote source to transmit the request signal to the server.

11. (original) The method of Claim 8, further including the step of programming the charging

device via the rechargeable electronic device to transmit the request eignal to the server.

> 12. (original) The method of Claim 7, further including the step of notifying the remote source of the evailability of the charging device for receiving the data.

13. (original) The method of Claim 7, further including the step of replacing previously stored data within the charging device with the data received from the remote source.

storing the data fransferred from the charging device to the rechargeable 14. (original) The method of Claim 7, further including the staps of:

eplacing previously stoned data within the rechargeable electronic device with

electronic device within the rechargeable electronic device;

the data transferred from the charging device.

means for coupling the rechargeable electronic device to the charging device; means for selectably storing the received data within the charging device; means for recelving data from a remote source via a charging device; neans for charging the rechargeable electronic device; and neans for selectady transfering the stored data and the received data from the

charging device to the rechargeable electronic device.

16. (original) The charger system of Claim 15, further comprising:

means for processing the data transferred to the rechargeable electronic device;

ם

means for confolling an electronic device via the rechargeable electronic device Page 4 - RESPONSE TO OFFICE ACTION DATED JANUARY 29, 2004 Serial No. 10/020,022 In accordance with the processed data,

15. (orlginal) A charger system comprising:

17. (ortginal) The method of Claim 15, wherein the remote source is a server; and turther computating means for initiating transfer of the data from the server to the charging device by transmitting a request signal to the server.

18. (original) The charger system of Claim 17, further comprising means for programming the charging device via the remote source to transmit the request signal to the server.

19. (original) The charger system of Claim 17, further comprising means for programming the charging device via the rechargeable electronic device to transmit the request signal to the
